Collaboration Opportunities with the National Institute of Informatics, Tokyo

Prof. Emmanuel Planas,
Global Liaison Office Deputy Director

**2024, November 22th, 11:15 a.m.,
School of Engineering (room 175 S. Marta)**

This seminar introduces the **National Institute of Informatics** (NII) and opportunities for international cooperation with NII.

NII is the Inter-University Research Institute (ROIS) for advanced Computer Science Research and Global Science Data Infrastructure support, situated in the heart of Tokyo, Japan. NII is ranked **top 2 for publications in Computer Science in Japan**. Research activity is divided in four Departments:

1. Principles of Informatics;
2. Information Systems Architecture Science;
3. Digital Content and Media Sciences;
4. Information and Society.

The Global Liaison Office (GLO) at NII has established partnerships with more than 100 MOU partners. GLO supports international exchanges via the "**MOU Grant Program**" under which a NII researcher can invite a colleague from overseas for a stay, or send some member of his team for a research visit (up to 2 months, around 40 researches a year supported). GLO also offers the "**NII International Internship Program**" in which we welcome and fund MOU partners Master's and PhD. students for a research stay in one of our teams (3 to 6 months, around 140 students per year).
